

Deluxe Home Theater Package (HTI DELUXE)

- Single room connection of current and new components, as allowable by the system source capacity.
- Cable management on all system components.
- Custom labor to wall mount or flush mount (in-wall) 2 speakers in current room as allowable by home construction.* Brackets are not included and must be purchased separately by customer prior to installation. Wiring to these speakers will be concealed in-wall, under carpet, floor penetration, etc.
- Secured wiring (no concealment) and placement of remaining speakers on existing foundations. See Note #4.
- Installation of all speakers will include up to 150 feet of class 2 or 3 speaker wire for entire system.
- Explanation of work performed and additional instruction on:
 1. Turning the Home Theater System and Components on and off.
 2. Using the remote control.
 3. Explaining different speaker settings.
 4. Demonstrating switching between sound settings, if applicable.
 5. Demonstrating switching between connected Components.
 6. Answering the customer's questions regarding the nature of the installations to ensure complete satisfaction.

*Any questions regarding the specific nature or special functions of the components will be directed back to the store.
